## SPONSOR'S CERTIFICATION

This is to certify the following:

- (1) Pursuant to 14 C.F.R. Part 150, Subpart B, Section 150.21(a), the "2011 Existing Condition Noise Exposure Map" (Figure 7 on page 55) identifies each noncompatible land use in each area depicted on the map, as of the date of submission, and the "2016 Five-Year Forecast Condition Noise Exposure Map" (Figure 8 on page 56) accurately represents forecast conditions for the fifth calendar year beginning after the date of submission (based on reasonable assumptions concerning the future type and frequency of aircraft operations, number of nighttime operations, flight patterns, airport layout including any planned airport development, planned land use changes, and demographic changes in the surrounding areas); and the nature and extent to which those forecast operations will affect the compatibility and land uses depicted on the map.
- (2) Pursuant to 14 C.F.R. Part 150, Subpart B, Section 150.21(b), all interested parties have been afforded adequate opportunity to submit their views, data, and comments concerning the correctness and adequacy of the draft noise exposure map and descriptions of forecast aircraft operations.
- (3) Pursuant to 14 C.F.R. Part 150, Subpart B, Section 150.21(e), the revised Noise Exposure Maps and associated documentation for Van Nuys Airport submitted in this volume to the Federal Aviation Administration under 14 C.F.R. Part 150, Subpart B, Section 150.21, are as true and complete.
